Net Profit

\$ EBIT and % EBIT Margin vs Breakeven Point

Breakeven point is the sales level where total revenue matches the total costs, resulting in no profit or loss for the business.

Revenue-to-Net Profit Bridge

Expenses are the sum of Cogs, Opex, and Interest & Tax.

Net Profit

Net Profit Margin % by Month

Represents the percentage of revenue that becomes net profit. A higher margin signals better overall profitability.

Monthly Net Margin % Changes

Represents MoM change in net margin. A higher variance signals stronger overall profitability.

Financial Statement Analysis

Break-even Point The sales level where total revenue equals total costs, resulting in no profit or loss.

Formula: $\text{Fixed Costs} \div \text{Contribution Margin \%}$.

Revenue The total inflow from sales after returns.

Formula: $\text{Sales} - \text{Sales Returns}$.

Measure: \$ Revenue.

COGS (Cost of Goods Sold) Direct costs attributable to goods or services sold (materials, labor, direct overhead).

Formula: Sum of direct cost accounts.

Measure: \$ COGS, % COGS Ratio.

Gross Profit / Gross Margin $\text{Gross Profit} = \text{Revenue} - \text{COGS}$. $\text{Gross Margin \%} = (\text{Gross Profit} \div \text{Revenue}) \times 100$.

Measure: \$ Gross Profit, % Gross Margin.

Opex (Operating Expenses) / Opex Ratio Operating expenses such as rent, utilities, salaries, marketing. $\text{Opex Ratio \%} = (\text{Opex} \div \text{Revenue}) \times 100$.

Measure: \$ Opex, % Opex Ratio.

EBIT / EBIT Margin Profit before financing and tax. $\text{EBIT Margin \%} = (\text{EBIT} \div \text{Revenue}) \times 100$.

Measure: \$ EBIT, % EBIT Margin.

Interest Expense / Interest Coverage Ratio Cost of debt financing. $\text{Interest Coverage Ratio} = \text{EBIT} \div \text{Interest Expense}$.

Measure: \$ Interest Expense, Interest Coverage Rate.

Net Profit / Net Margin Final bottom line after all costs and tax. $\text{Net Margin \%} = (\text{Net Profit} \div \text{Revenue}) \times 100$.

Measure: \$ Net Profit, % Net Margin.

Variance % (MoM Change) Month-over-Month % change in KPI values.

Formula: $(\text{Current Month} - \text{Previous Month}) \div \text{Previous Month}$.

Measure: Variance %.
